EPILEPSY WARNING

Please read before using this video game system or allowing your children to use it. Some people are susceptible to epileptic seizures or loss of consciousness, when exposed to certain flashing lights or light patterns in everyday life. Such people may have a seizure while watching certain television images or playing certain video games. This may happen even if the person has no medical history of epilepsy or has never had an epileptic seizure. If you or anyone in your family has ever had symptoms related to epilepsy (seizures or loss of consciousness) when exposed to flashing lights, consult your doctor prior to playing. We advise that parents should monitor the use of video games by their children. If you or your child experience any of the following symptoms: dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, while playing a video game, IMMEDIATELY discontinue use and consult your doctor.

PRECAUTIONS TO TAKE DURING USE

- Do not play too close to the screen. Sit a good distance away from the television screen, as far away as the length of the cable allows.
- Externally play the game on a small television screen.
- Avoid playing if you are tired or have not had much sleep.
- Make sure that the room in which you are playing is well lit.
- Rest for at least 10 to 15 minutes per hour while playing a video game.

EPILEPSIE-WARNUNG

Bitte lesen Sie diese Hinweise, bevor Sie dieses Videospiel-System benutzen oder Ihre Kinder damit spielen lassen. Bei manchen Personen kann es zu epileptischen Anfällen oder Bewußtseinsstörungen kommen, wenn sie bestimmten Blitzlichtern oder Lichteffekten im täglichen Leben ausgesetzt sind. Diese Personen können einen Anfall erleiden, während sie bestimmten Fernsehbildern ausgesetzt sind oder bestimmte Videospiele benutzen. Es können auch Personen davon betroffen sein, deren Krankengeschichte bislang keine Epilepsie aufweist und die nie zuvor epileptische Anfälle gehabt haben. Falls bei Ihnen oder einem Ihrer Familienmitglieder unter Einwirkung von Blitzlichtern mit Epilepsie zusammenhängende Symptome (Anfälle oder Bewußtseinsstörungen) aufgetreten sind, wenden Sie sich an Ihren Arzt, bevor Sie das Spiel benutzen. Eltern sollten ihre Kinder bei der Benutzung von Videospielen beaufsichtigen. Sollten bei Ihnen oder Ihrem Kind während der Benutzung eines Videospiels Symptome wie Schwindelgefühl, Sehstörungen, Augen- oder Muskelzuckungen, Bewußtseinsverlust, Desorientiertheit, jegliche Art von unfreiwilligen Bewegungen oder Krämpfen auftreten, so beenden Sie SOFORT das Spiel und konsultieren Sie Ihren Arzt.

VORSICHTSMASSNAHMEN WÄHREND DER BENUTZUNG

- Verwenden Sie für die Wiedergabe des Spiels einen möglichst kleinen Fernsehbildschirm.
- Spielen Sie nicht, wenn Sie müde sind oder nicht genug Schlaf gehabt haben.
- Achten Sie darauf, daß der Raum, in dem Sie spielen, gut beleuchtet ist.
- Ruhen Sie sich während der Benutzung eines Videospiels mindestens 10 bis 15 Minuten pro Stunde aus.

NOTHING LIKE THE SMELL OF ENTRAILS IN THE MORNING...

First there was Dr. Proton and his dastardly robotic legions. Then the Rigelatins and their XSG Think-o-matic War Computer. Torched 'em all. See ya bye-bye! And now this... Los Angeles on the brink of total devastation — and with it, humankind on the brink of annihilation.

Some welcome home party. But hey, it's a party nonetheless, as you have the pleasure of painting the once-pristine sidewalks with the entrails of Reptilian Enforcers, mutated Pig Cops, and heinous Octabrainz — all in a noble (and extremely brutal) quest to thwart the aliens' Machiavellian plot to crack Mother Earth wide open and reap her bountiful resources.

So without further ado, get your Platinum-dood, square-jawed bad-ass out there and fire-up these intergalactic freakazoids like there's no tomorrow. Because if you wait for back-up, there will be no tomorrow.

Rock on, Duke!

SOUND OPTIONS

Here you can adjust the following sound options:

Mode: Stereo or Mono

Music: On or Off

Music Volume: Raise or Lower

MAIN GAME SCREEN

Displays the status of your weapons. For each weapon there is a two part number. The first set of numbers indicates the amount of ammo you have for a particular weapon. The second set is the maximum amount of ammo you can carry for that weapon.

Brightly lit numbers indicate the currently selected weapon. Medium brightness indicates you have the weapon in your arsenal, but it is not currently selected. If the numbers are dark, you do not yet possess the weapon.

The following items appear on the Main Game Screen.

Health

Displays your health level. If this drops to zero, you're dead.

Armour

Shows percentage of your armour that remains.

Weapons Ammo

Displays the amount of ammo remaining for use with your currently selected weapon.

Inventory

Displays the percentage and status (if applicable) of the currently selected inventory item.

Access Cards

Displays the keys currently in your possession. Access Cards are required to unlock certain doors. Once you use a Access Cards to unlock a door, it will no longer appear in your inventory.

WEAPONS

The right hardware and firepower make all the difference when trying to save the world. You begin with a Handgun, but your survival depends on your ability to locate and upgrade your weapons collection. The following is a summary of available weaponry.

The Mighty Foot

You'd be surprised at how effective live toes, a heel, and an arch can be — especially against a Pig Cop or when you want to bash through an air duct grill, break a window or squash an unwitting opponent. When in doubt, stomp it out!

The Pistol

Although more powerful than The Mighty Foot, the Handgun is the least effective of all your weaponry. It is a godsend, however, when no other weapon is available. Fires a 12 round succession from a full 48-round clip. The maximum number of bullets you can carry is 200.

The Shotgun

The first order of business when beginning a new level is to locate a Shotgun. Makes easy work of bipedal aliens, including Pig Cops, who also carry Shotguns. Shotguns come with 10-shell boxes and the most shells you can carry at one time is 50.

The Ripper Chaingun Cannon

The weapon of choice for mowing down Pig Cops, Troopers and Captains. Also very effective in shredding an Octabrain's pulpy flesh. Comes with 50 rounds, as do its ammo cases. You can hold up to 200 rounds at one time.

The Rocket Propelled Grenade (RPG) Launcher

No other weapon equals the impact of an RPG projectile. Not only can you blow mutants away from great distances, but you can also blow holes right through walls and even bore tunnels through solid rock. Ammo available in 5-round charges. Most you can haul is 50 rounds. Exercise caution when using this weapon in close quarters.

Pipe Bombs

These crude creations are a guerrilla-type weapon you can time and detonate remotely. Pipe Bombs are strategic weapons. Because you can detonate from a distance, you can set up traps for your alien adversaries. Most you can carry at one time is 50.

The Shrinker

This one shrinks your opponent into squishable, bug-sized pests you can dispose of using The Mighty Foot. The Shrinker is only activated for a brief period of time so hop to it. NOTE: White Duke is shrunk (via mirror, ricochet, or in Dukematch) he can not pick up or use Powerups, or use any of his weapons.

The Devastator

This double-barrelled weapon of awesome destruction launches explosive charges with concentrated impact. Makes short work of most enemies. Exercise caution when using this weapon in close quarters.

The Tripbomb

Another strategic weapon, the Tripbomb is placed on flat walled surfaces. After a two second delay, a bright red laser beam is emitted across to the opposite wall. Crossing the beam sets off an incredible blast annihilating everything within range.

The Freezethrower

One blast from this cold piece changes the molecular structure of any opponent, transforming it into an ice sculpture capable of being shattered with The Mighty Foot, or vaporised with a shotgun blast. Be sure to do away with any mutant frozen, last, as this weapon's effects melt away quickly.

LINE MAP

As you navigate into more complex installations, you will find the online maps to be quite handy.

The map shows the installation's various rooms and areas, so you can see where you've been and where you still need to go.

Press the START Button and move the D-Pad to "MAP" and press left or right to switch the map "ON" or "OFF" for a top-down view of the areas where

Duke has explored. You will be displayed by a small arrow in the centre of the map. In this mode, you can use the Automap while still viewing the action. To zoom the map in or out, press the press Buttons A or C to make the map smaller. Press Button X to make the map bigger (to see more detail). You can only zoom the map while you have the "Map" highlighted in the Options Screen. To change the size of the map, press the START Button, move the cursor to "Map" and press Buttons A, C or X.

DUKE'S POWER-UPS

Weapons are a must, but without power-ups, you haven't a chance in Hell. Power-ups are not necessarily destructive, but rather bestow you with special abilities. The following is a detailed description of each power-up.

To activate some of the Power-ups, press the START Button to access the Options Menu. Those items that are available are highlighted. Move the D-Pad to select the item and press Buttons A or C to switch that item on or off.

Health Items

Medkits

Medkits come in two sizes: small and large. Portable medkits are also available. Small and large medkits increase your health by 10% and 30%, respectively. Portable kits carry a full 100% of health and you activate them when needed.

Atomic Health Units

These glowing atom-like units enable you to overcome even the most incredible odds. A single atomic health unit will cause your health to soar by 50% — even above and beyond 100%. The most health you can amass with the atomic health unit is 200%.

Armour

Armour can be found in secret areas, as well as on the bodies of rotting corpses. A fresh set provides you with 100% protection. But be careful, armor wears out with abuse, so when your armor level drops below 50%, it's time to rely on your defensive skills.

Inventory Items

To activate an inventory item, press the START Button during gameplay to access your inventory. The items you hold in your inventory will be displayed across the top of the Options Screen. Press the D-Pad LEFT or RIGHT to move the cursor until it highlights the item you want to activate. Once you've highlighted the correct item, press Button A to activate it. For certain items, you can turn them off by following the same procedure — press START, highlight the correct item and press Button A again.

Access Cards

Access Cards enable you to open special doors oratches. Your strategy for solving a level includes determining what cards you need and in what order you must have them. Without this knowledge, many level areas will remain a mystery.

Steroids

Steroids deliver a rush of power and speed you will quickly come to appreciate. Boosts your kicking prowess and overall speed to amazing levels. Use steroids wisely as the adrenaline pump-up lasts only 30 seconds.

Holoduke

This full-size decoy (complete with comic book-style jawline) provides a solution in the most desperate of situations. Most effective when accompanied by a strategically placed pipe bomb! When you activate the Holoduke, you will place it next to where you are standing so make sure that you're in the correct spot. The Holoduke runs on an internal battery and will keep going until it runs out of juice.

Jetpack

This amazing device allows you to fly for about 45 seconds at a time, so use in moderation. Ideal for reaching high places and uncovering secrets that would otherwise remain hidden. Also effective for plotting direction and short routes to lofty destinations. When the Jetpack is active, you will see an on-screen countdown indicating how much fuel is left in your Jetpack. You can't tilt the tank up, so once you've used all the fuel, your Jetpack is junk. Turn the Jetpack on and off from the Option Screen.

Night Vision Goggles (NVG)

NVGs allow you to see in the dark, where your enemies cannot. Lasts for about 35 seconds, so use it when you are sure enemies are lurking nearby. You can turn the goggles on and off from the Options Screen, so use them sparingly. While the goggles are active, you will see an on-screen countdown indicating how much battery life they have left. Once the battery runs out, you better make sure that you know where the light switches are.

Scuba Gear

Scuba gear allows you to breathe underwater. Once you have obtained the scuba gear, it will automatically activate whenever you submerge. Tanks are good for 45 seconds, so make haste as you waste.

Protective Boots

These fancy galoshes keep your toes free from harmful toxic substances and chemicals that circulate throughout many levels. Like the scuba gear, they automatically activate in times of need. When active, you will see an onscreen countdown indicating how much time until the protective boots are worn out. Make sure that you make it to safe ground before the timer runs out.

EVALUATING DUKE'S FOES

This hostile cast of alien invaders is here to subjugate our world. Not to mention conduct biogenetic experiments with human females. It's your job to bounce them back to the void where they belong.

Assault Captains (Captains)

Like their minion troopers, the captains sport laser pistols and jetpaks. They also wear phased-induced teleporter devices on their wrists, which means they can dematerialize and appear when you least expect it. Each strike saps 20% off your energy.

Assault Troopers

These are the grunts of the alien alliance. Although capable of being destroyed with a few rounds of your hand-gun, troopers are never easy to deal with and are seldom discouraged in their pursuit. But beware, as each trooper blast can cause 15% reduction in your health status.

Protozoid Slimers (Slimers)

These gelatinous bodies suck your brain out through your nose. We recommend your Pistol or Shotgun, or the Ripper Chaingun. If you let them crawl up your pant leg and through your nose — and it's all over! They colonise, too. Beware: you can't kick them once they grab onto your face, so blast away.

Pig Cops

The mutant police are faithful servants of evil, devoted to serve and protect the alien alliance. Pig Cops are unyielding and wrapped in armour, making them hard to destroy, but worth it, yet a prize as you can loot their protective cover once destroyed. Capable of inflicting an incredible 20% damage rate (25% if you are not wearing body armour).

Recon Patrol Vehicles (RPVs)

RPVs are single-user, anti-gravity transports that allow Pig Cops to take to the air. Here they can follow your every move and attack from above using powerful side-mounted laser cannons that can inflict 30% worth of energy-sapping damage.

Enforcers

Enforcers are the alien armada's clean-up crew. Armed with Ripper Chainguns, these mutant mercenaries attack in packs and wear protective gear. You can usually remove their chainguns and chaingun ammo after each kill.

Octabrain

Lurking in dark, moist areas, these disgusting things take to the air as easily as they dominate the depths of water bodies. By focusing their immense mental energy, an Octabrain can nearly paralyze you, sapping 50% of your energy in a single shock.

**Battlelord**

This is the first boss Duke will encounter. It is size doesn't give you a cardiac, the sheer impact of his over-under Ripper Chaingun Cannon surely will. A sustained attack from the Battlelord can decrease your health at a rate of 5% to 10% per second.

**Battlelord Sentry**

A much smaller version of the original, the Battlelord Sentry is not quite as ferocious as his taller cousin and is easier to kill. Good practice for the real thing.

**Assault Commander (Commander)**

A massive hovering torso connected to a free-floating anti-gravity deck, this dude is devastation on thin air. He can levitate and dash without warning. He can dice you up like a food processor. And he can launch deadly projectiles that will reduce your health by 50% to 75% with a single shot. Good luck.

**Sentry Drone (Drone)**

Sporting anti-gravity units, Sentry Drones are highly maneuverable and elusive. Once they track you down they can shave up to 35% off your health. Seek shelter behind a thick door or wall when you hear them coming, as drones often collide with obstacles in their zeal to execute their programs.

**Overlord**

Equipped with a heavy harness that holds weapons and also protects him from injury, the Overlord is also blessed with keen eyesight, lightning quick reflexes and a self-contained arsenal. It's gonna take all your heavy assault weaponry to incapacitate this moon man.

**Cycloid Emperor (Emperor)**

This walking abomination is a one-eyed giant whose breath is capable of emanating energy blasts in rapid succession, overwhelming opposition in a matter of seconds. And his built-in ports fire charges so harmful to your health, we're not allowed to put their effects in print.

LEVELS

After defeating the Rigelatins and thwarting their megalomaniacal dreams of an enslaved humanity, you return to your hood, L.A., only to find it under siege at the slimy appendages of another wave of malevolent aliens. Now you must unload your wicked arsenal on the underworld's most voracious band of scum this side of Hollywood Blvd. And in the process, return your old stomping grounds — the epicenter of hapless humanity — to the once-pristine bastion it once was. Ah heck, just blow the #@% out of anything that breathes. Enjoy!

Hollywood Holocaust

Stars are made here. Yet the only way you're gonna get a spot on the Walk of Fame is by having one of your body parts land there. Moral decay abounds, as evident by roaming Pig Cops and Captains. Have a blast!

weaponry, then commence to blasting Troopers and Captains. Use Keycards to work your way through this labyrinth of cell blocks and courtyards, and don't forget to stop at the prison chapel for guidance — as you haven't a prayer out here!

The Red Light District

Welcome to the seedier side of L.A. Beware of temptation as this place is a sure test of your stamina. Access Cards are your way through this extremely graphic neighborhood. Expect plenty of Pig Cops, Captains and Alien Troopers.

Toxic Dump

A booby-trapped cargo sub has landed you boot deep in toxic sludge at the Dump site. Guess who gets to clean up the mess? Radioactive substances are everywhere, as are more Pigs, Troopers and Captains. Don't forget to pick up your Scuba Gear as you may have to immerse yourself in your work.

Death Row

You've been sentenced to die in the chair and there's no time for pardons. Get out of that hot seat, get hold of some

The Abyss

Prepare to discover how far these alien infiltrators have gone in their quest to possess the earth. Don't let mutant mythology poison your train of thought as your primary goal is to descend into the depths of hell and ignite the Battlelord in a fiery inferno. There'll be plenty of time for Martian mysticism after the fire.

The Launching Facility (secret level)

Your mission here is basic, yet in no way simple: find it. This secret level challenges you to stop the rocket to the Moon and rescue the female specimens enshrined in cocoons on board. Activate the self-destruction mechanism, then push the big red detonation button on the remote control switch. Just remember to get the "2" off the ship first!

Spaceport

Your first stop along your tour of duty in Lunar Apocalypse finds you aboard a hovering, man-made station in orbit. Infested with aliens, you must board the shuttle and infiltrate The Incubator. The Shrinker and Devastator await your arrival. Walls of mutant mercenaries abound.

The Incubator

This is where the aliens' ghastly young hatch. Dozens of eggs litter the area waiting to spew new members of the alien race. Get to the incubation chamber immediately and destroy the nests — before mommy gets home!

Warp Factor

Expect the unexpected as you penetrate this sci-fi-influenced multi-level facility and locate further clues into the alien's plot to crack the

earth open like a walnut. (Beware of cameos by past nemeses.)

Fusion Station

This is the mechanism that juices up all the lunar stations. Your job is to blow the damn thing's head off. But first you must penetrate this gargantuan structure and use your most powerful weaponry to torch Sentry Drones and Assault Commanders.

Occupied Territory

Occupied Territory is daunting by the sheer number and viciousness of your co-occupants. A fearsome force of fiendish foes has come together to ensure your fall. Remember, it's BYOB (Bring Your Own Body Bag).

Tiberius Station

Housing an elaborate duel maze that will test your wits as well as your patience, Tiberius does have one safeguard: plenty of power-ups. Blow up everything in sight.

Lunar Reactor

Twice as large as Tiberius Station, the Lunar Reactor is a mass of hallways, chambers and multiple secrets. Your mission is to seek out and destroy the core reactor, after you face off and defeat your oppressors.

The Dark Side

Somewhere among the convergence of Alpha, Beta and Gamma transports you will become closer to your own soul as you ponder some very deep mysteries here. Your findings just might blow you away.

Overlord

Prepare to come face to face with the charming Overlord and his close

companion — a massive cannon aiming a concentrated energy beam at California's San Andreas Fault.

Raw Meat

Begin by leasing your taste buds in the perimeter, then devour the main dish in the dining chambers where the right Access Card gets you preferred seating. Top off the meal with a few libations at the bar or enjoy our outdoor pool just outside the lobby.

Bank Roll

Don't let its unfeeling and self-serving facade fool you. This place has plenty to offer — given you have the right Access Cards. Blast the vault wide open and reap the fruits of your labour. No need for a loan officer here.

Flood Zone

L.A. didn't fare well in the big quake. Prepare to spend half your time under water as you search for Access Cards among Octabrainz and Assault Commanders. Watch that oxygen level!

L.A. Rumble

Concrete, steel, glass, and other materials forged by human hands for one purpose only: sheer brutality. Hollywood Boulevard and the East Town Towers provide the ideal backdrop for this extremely uncivilized carnage classic.

Movie Set

Give the aliens a few weeks in Los Angeles and the next thing you know, they're taking over Tinsel Town, too. Yet the only shooting that'll take place here is the B-movie, drive-in splatter genre. Collect Access Cards before they run the credits.

Rabid Transit

It's time for an old fashioned chain battle in the subways of LA-LA Land. This level punishes carelessness and rewards fighting prowess, dexterity, and sheer guts.

Fahrenheit

Prepare to sweat bullets through a TV studio, a fire station, even through a cozy apartment. Sentry Drones and Assault Commanders dominate this landscape. Bring some pipebombs.

Hotel Hell

If it weren't for its dubious clientele, this flea-bag joint might actually be a nice place for power lounging. Enforcers, Troopers, Pig Cops and RPVs, however, give this place a bad name. No time for martinis at poolside, if you get our drift.

Stadium

Prepare for the ultimate showdown between the home town favorite — you — and the formidable Cycloid Emperor. There's much more at stake here than just ratings and home team pride: Earth.

FIGHTING SOLO — TIPS TO LIVE BY

Bottom line: You're gonna want to hone your skills before Duke-ing it out in DukeMatch mode. Take notes!

Moving With Agility

Your chances for overcoming your opponents are directly related to how well you can move in your virtual environment. After mastering your dance steps, add a bit of speed to the mix for optimum agility.

Sideslepping

Sideslepping allows you to plug your opponent, then retreat to reload behind an obstacle. Sideslepping also allows you to fire from behind a wall or barrier, making it very difficult for your opponent to get a good shot at you.

Strategic Movement

Good gaming strategy dictates that you learn to take advantage of your full range of motion. And there will be plenty of opportunities to strafe, jump and perform 180-degree turns.

ITEMS TO WATCH OUT FOR

Given the diversity and types of ground you will be covering, you must make the most of every sense and take in as much info about your whereabouts as possible. Keep an eye out for the following helpful items:

Exit Symbol

Activate this to exit the level.

C9 Canisters

Exploding barrels and canisters are strategically placed throughout each level. Shoot these and get away, as they say.

Teleporters

Walk through these futuristic passageways and find yourself in another part of the level.

Water

You can make small health gains by drinking deeply from such sources as water fountains, broken fire hydrants, and broken toilets.

Monitors and Camera

Use security monitoring systems to locate possible enemies and power-ups.

Ventilation Shafts

You can crawl through vents where you will often find power-ups and other helpful items. Blast or kick to open.

Cracks in Walls

Look for cracks in walls and rock as you can usually blow these open with a Pipe Bomb, RPG or Devastator to create tunnels or emergency exits.

The Babes

Be nice to these women. You don't even want to know what happens if you mess with them.
